

EVoline® UL Products

EVoline® One

Installation in shallow surfaces
The One is a small and compact circular socket outlet which can be mounted horizontally or vertically into virtually any type of surface. Alternative connectivity options include USB Charger or Data/Multimedia combinations. Installation is simple, top/front-fixed into an infinite surface depth from 9mm minimum. With its flexible cable entry, total depth of product from below socket fascia is only 50mm. Available in stylish finish options.

UL listed and tested to meet UL 1363. Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.

EVoline® Square80

Compact Power & Data system
The Square80 offers a compact solution, comprising a US power socket, USB charger and optional third outlet. The sliding cover also provides the option to include an integrated Wireless Charger which can be used in both open and closed positions with compatible smartphone devices. Easily installed into a Ø 80 mm circular cut-out.

UL listed and tested to meet UL 1363. Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.

EVoline® Port

Fully retractable – circular power unit
The Port requires a relatively small footprint by way of a circular Ø 102mm cut-out. Totally modular and with its patented rocking cover, devices and appliances can be plugged in and used whilst the Port is in either the upright or retracted position under the table/worktop. Available in a range of stylish profile and cover finishes, including the ever-popular and timeless brushed Stainless Steel.

UL listed and tested to meet UL 962A with 1 – 5 socket outlets. Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.

EVoline® FlipTop Push

Organised cables above and below
The FlipTop Push is an elegant and executive in-desk solution for high end boardroom, conference and meeting tables alike. With its 'soft-touch' opening mechanism, this modular system offers various combinations of Power Sockets, USB Chargers and wide range of interchangeable Data/Multimedia sockets. Available in various sizes and high quality solid Stainless Steel cover finish options.

UL listed and tested to meet UL 962A with 1 – 8 socket outlets. Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.

EVoline® FrameDock

In-desk modular power
The FrameDock offers a compact and versatile solution, designed to be flush-mounted into either horizontal or vertical surfaces such as workplace desking, pods, kitchen worktops or even furniture side/end panels. With a depth of only 51mm and front/top mounting, it can be utilised in numerous applications. Interchangeable Data and Multimedia modules provide unlimited flexibility for future-proof requirements, especially within the workplace and public environments.

UL listed and tested to meet UL 962A with 1 – 8 socket outlets. Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.

EVoline® Dock

Proven for office and hotel
The Dock claim to fame is being the very first product of the EVOLINE range produced by our factory in Germany. It provides easily accessible and robust desk-top power for even the most demanding of environments, with various fixing/clamp options to suit different applications. Configurable with Power, USB Charger and Data/Multimedia options, this provides connectivity tailored to your needs.

UL listed and tested to meet UL 1363 with 1 – 8 socket outlets. Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.

EVoline® R-Dock

A close fit

The R-Dock provides a versatile solution for numerous applications. Thanks to its profile design, it fits perfectly into any 90° angled corner such as a wall-backed desk/table or even back-to-back as a double unit within in an open space environment. Modular Power, USB and Data/Multimedia options ensure this offers an ideal fixed or portable option.

UL listed and tested to meet UL 962A with 1 – 8 socket outlets. Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.

EVoline® V-Dock

Fits in every corner

The V-Dock provides the perfect solution to help overcome 'dead' 90° corners, whether horizontal or vertical. Utilising the space behind the aluminium profile enables the cable to be hidden from view, whilst 45° orientation of the socket fascia makes it straightforward to connect devices and appliances. Modular configuration and interchangeable Data/Multimedia modules provide unlimited flexibility for future proofing within the workplace.

UL listed and tested to meet UL 962A with 1 – 8 socket outlets. Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.

EVoline® U-Dock

Under-Desk power bar

The U-Dock is the ultimate solution for sub-desk Power & Connectivity within desk, meeting and boardroom table applications. Compact and robust in design, its aluminium profile is freely configurable with Power socket, USB and interchangeable Data/Multimedia options. Quick and easy to install via optional integrated 'mounting tabs' or various other fixing methods enabling it to be mounted in a number of ways.

UL listed and tested to meet UL 962A with 1 – 8 socket outlets. Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.
