# EVOLINE® One

## Upgrade Your Furniture.

EVOLINE One provides the ideal compact power socket and charging point. This circular unit can be installed either horizontally or vertically and customised to client requirements thanks to the wide range of modular inserts available.

With various finish options combined with a tasteful selection of interchangeable bezels and 360°

rotating covers, EVOLINE One offers the ideal solution ANYWHERE.

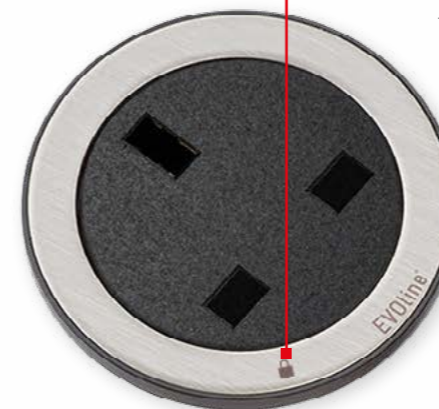

Whether in the guest bedroom, bar, lounge, restaurant, lobby, meeting room or conference areas, the EVOLINE One provides quick and safe access to discreet aesthetically pleasing charging points wherever you need them.

Available with internationally approved sockets.

**NEW! OneLock**  
Effective anti-theft protection

**NEW! USB Charger A+C**

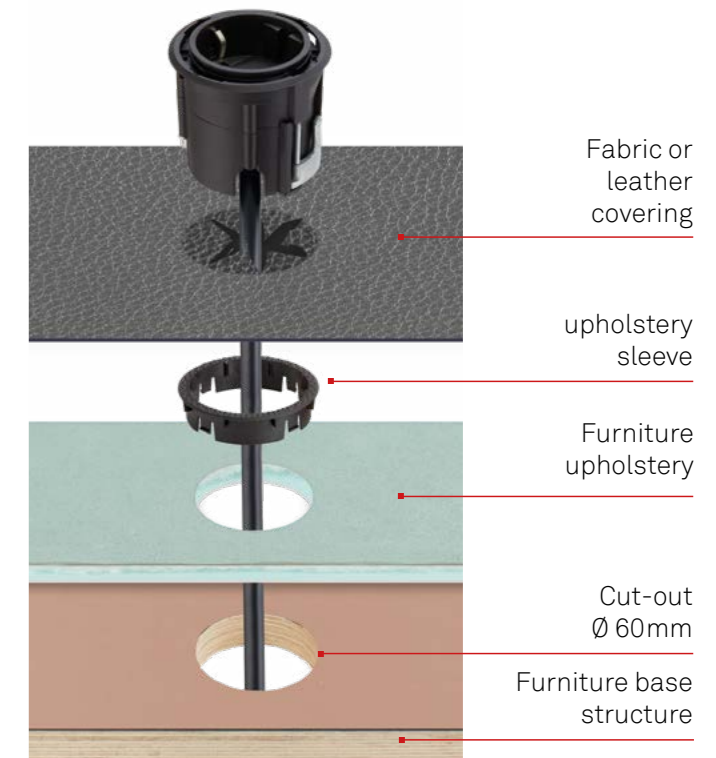

# EVoline® One

## Installation in Soft Seating.

Thanks to its specially designed and patented upholstery sleeve the EVoline One is perfectly suited for installation into upholstered furniture. Whether a leather armchair or fabric sofa, it adds eye-catching style to function within a variety of soft seating and furniture applications.

The upholstery sleeve and fixing clamp options enable the EVoline One to be installed into a variety of furniture, including fine or heavy upholstery with ANY depth of base structure.

# EVoline® BackFlip

## At the press of a finger.

Neatly presented in a variety of metallic and glass finishes, the EVoline BackFlip rotates 180° at the press of a finger to reveal two power sockets and a USB charger.

With their raised position when in use, the sockets are protected

against liquid ingress and spillages, thus providing an extra safe solution!

The shallow installation depth of only 53mm allows mounting into a multitude of horizontal, vertical or inverted surfaces and even above drawers.

Available with internationally approved sockets.

Options to Flush mount.

Fast assembly into surface depths of 10mm-40mm

## NEW! USB-C Charger

# EVOLine® DockFix

## Retrofit Power. Anywhere.

NEW

The DockFix offers the ideal solution for areas requiring either retrofit power or a high degree of versatility and customisation. Modular and freely configurable, it provides any amount of power, data and multimedia connectivity wherever required.

Thanks to the simplistic mounting brackets, it is easily fitted directly onto or below a surface.

Whether a table, desk, high bench application or otherwise, it enables a quick, easy and retrofittable solution.

However and wherever positioned on the surface, it lies flat with all connections easily accessible to the end user.

Various design and finish options available.

Available with internationally approved sockets.

Freely configurable according to your requirements.

# EVoline® Square80

## Innovation + Qi Wireless Charging.

Quick and easy installation into a circular Ø 80mm cut-out, the EVoline Square80 presents a sleek and compact solution.

*Available with internationally approved sockets.*

Housing a power socket and USB charger A or C, there are also options to include Cat6 or USB-C Power Delivery and Qi Wireless Charger.

If opting to include Qi Wireless Charging, the innovative sliding

cover is designed to charge Qi compatible mobile phones wirelessly in either the open or closed position.

Various finish options available, ideal solution for guest bedrooms, bar lounge and lobby areas.

# EVoline® Circle80

**Versatile. Compact.  
Cost effective.**

The EVoline Circle80 provides a power socket, USB Charger A+C and cable aperture with options to include data, multimedia or USB-C Power Delivery.

Within the versatile cable aperture an integrated locking clip slides across to retain any cables in order to keep the table/desk surface cable-free.

The shallow 50mm installation depth and innovative fastening system guarantee simple and fast assembly.

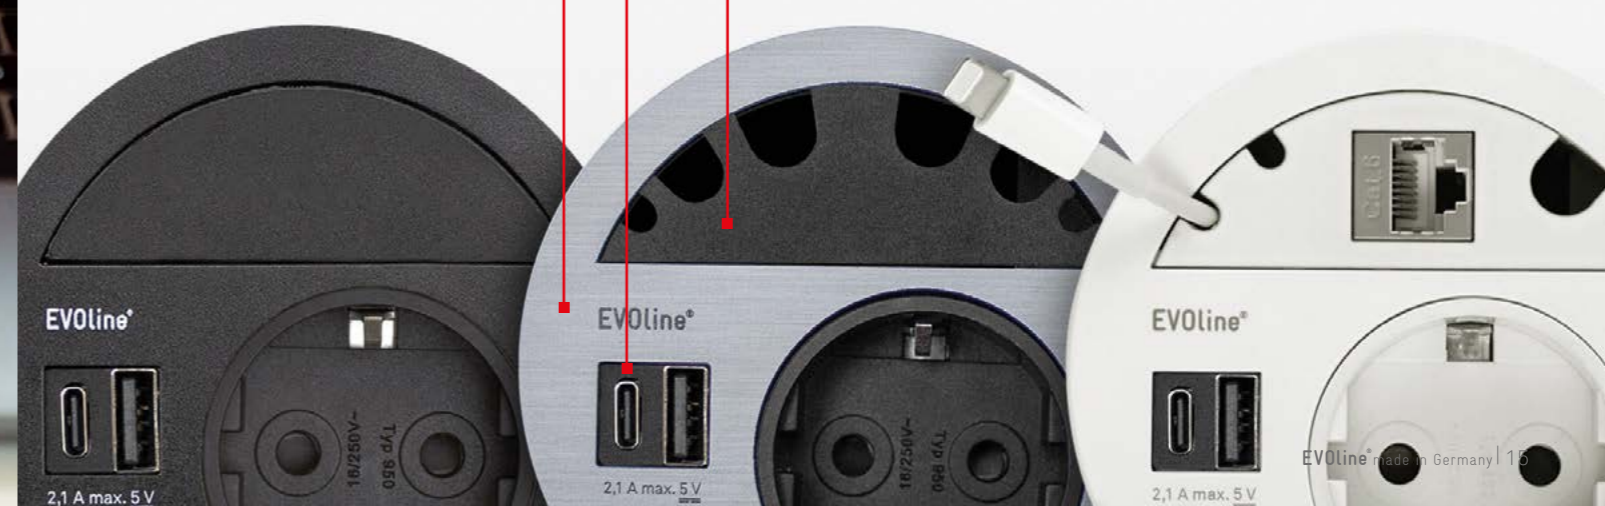

*Available with  
internationally  
approved sockets.*

reddot  
design award

# EVoline® Port

## Big Connectivity. Small Footprint.

The EVoline Port provides modular power and connectivity customised to requirements, as much or as little as needed.

Available in an exciting range of finish options from traditional Silver to Antique Brass or All Black, it's the perfect solution for business hubs,

meeting rooms, conference areas and even guest bedrooms.

The patented rocking cover enables devices to be connected whilst concealed under the table/desk surface, presenting a minimalistic and smart aesthetic whether in use or not.

## LED Nightlight

Available with  
internationally  
approved sockets.

Freely configurable  
according to your  
requirements.

# EVoline® Port Push

## Connect at the press of a finger.

The EVoline Port Push is operated with a push-to-open function, facilitating power and connectivity to be instantly available at the touch of a finger.

Even when devices are connected it can be retracted into the table/desk with a gentle push of the patented cover. Available in metallic and glass finish options with minimal footprint.

Available with internationally approved sockets.

**Patented cover function.**  
Fully retractable even when connected.

Freely configurable according to your requirements.

# EVoline® FlipTop Push

## Executive Connectivity.

The EVoline FlipTop Push is an elegant, integrated power and connectivity solution for executive guest bedrooms, business hubs, meeting rooms and conference areas.

Glides open at the press of a finger and fully retractable even when fully in use. Various high quality finish options available for the discerning clientele.

*Available with internationally approved sockets.*

*Freely configurable according to your requirements.*

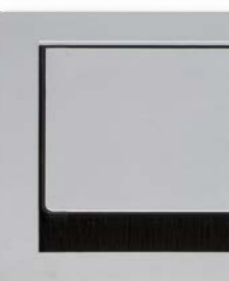

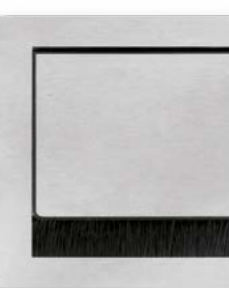

Options to flush mount.

Fast and Simple installation into surface depths of 10mm-50mm.

Built in cable clips for for under-desk cable management.

# EVoline® Dock Square

## Portable Connectivity for any surface.

The EVoline Dock Square presents our modern generation of on-desk solutions, combining modular, compact and mobility for ANY type of surface, ANYWHERE!

Quick, easy and secure reversible mounting without tools.

Available with internationally approved sockets.

Freely configurable according to your requirements.

Solid Stainless Steel clamp option provides fast, solid and mobile fixing.

Benefitting from innovative means of fixing or clamping, along with a contemporary range of finish options, this certainly provides power and connectivity wherever you want it.

# EVoline® FrameDock|Hide

## Versatility. Covered or uncovered.

The EVoline FrameDock provides the perfect solution for flush mounted sockets or charging into virtually any horizontal or vertical surface.

Totally modular, it can be customized to suit your needs however much or little connectivity required. EVoline FrameDock is also designed

for installation into soft seating applications providing seamless integration of additional sockets. Various finish options in conjunction with only 53mm total installation depth make this a robust and versatile all-rounder.

Optional new cover system enables your connectivity to be covered or uncovered when not in use.

Available with internationally approved sockets.

Freely configurable according to your requirements.

NEW

## FrameDock Hide

Provides the option for connectivity to be covered or uncovered.

# EV0line® Qi Charger

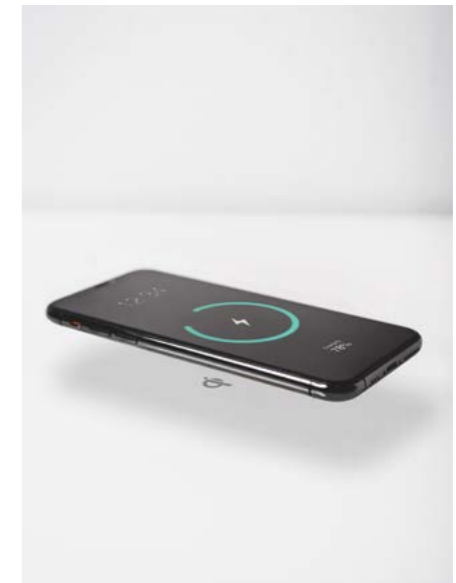

## Wireless charging. Simple.

Designed to be installed either surface mounted or hidden discreetly below, the EV0line Qi Charger provides simple to use and cable-free wireless charging.

Clean and minimalistic, it is ideally suited for guest bedrooms, bar lounge areas and even meeting rooms.

Charges all Qi compatible devices including both Android and Apple.

Less cables, more charging.
