

CERTIFICATE OF CORPORATE CARBON FOOTPRINT

Company

Schulte Elektrotechnik GmbH & Co. KG

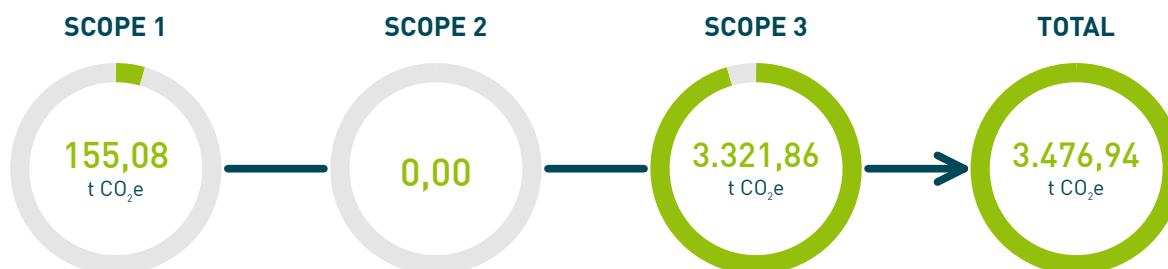

Title of Balance

Overall balance-CO2 2025

Accounting period: 01.01.2025 bis 31.12.2025

Accounting subject: In the GHG inventory of Schulte Elektrotechnik GmbH, all three scopes were considered. We compile our inventory according to the GHG (Greenhouse Gas) Protocol. Our focus is primarily on the quantity of materials and energy consumed for operations, which is why Scope 1, 2, and 3 are taken into account. A key aspect was establishing specific system boundaries. In our inventory, we analyze the entire journey of our raw materials (cradle to gate). It should be noted that PC was classified into the PET group due to lack of classification. Based on the aforementioned points and the number of decimal places allowed by the program, a safety margin of 5% was calculated.

Emissions & Description of the Balance Room

Balance standard: This certificate is to be understood as a self-declaration of the company. Depending on the self-selected system limit, the balance represents the sum of all direct and indirect greenhouse gas emissions of a company/site/process/product, expressed in CO₂ equivalents (CO₂e). The balance sheet is drawn up in accordance with the requirements for the quantitative determination and reporting of greenhouse gas emissions in accordance with the self-selected regulation or standard.
