

PRESS RELEASE

Functional, stylish and practical

The EVOLine® concealed FrameDock Hide power option

Lüdenscheid, October 2022. In offices, workshops, kitchens – but stand-alone workspaces above all, a frequent issue is where to put the power supply. After all, there's no wall to route cables along and a loose power outlet strip with tangled cables underneath a table can't be the answer either. Which is why EVOLine developed the stylish, fitted EVOLine® FrameDock Hide solution for workspaces. Its minimal mounting depth and timeless design are immediately impressive and enhance any interior design concept.

EVOLine has added a version with a cover to the popular FrameDock profile. The flat EVOLine® FrameDock Hide power outlet strip has an equally functional and attractive aluminium fold-up lid to protect the sockets from dust, dirt and splashes. The sophisticated solution can be fitted virtually anywhere and blends in almost seamlessly with its surroundings.

Perfect for any working environment

The compact EVOLine® FrameDock Hide helps make any work surface look tidy. The innovative power outlet strip is easy to attach and can also be retrofitted to worktops, tables and desks. It can be fitted almost flush with horizontal or vertical surfaces – on desk tops, walls or on the side of cupboards. Its high-quality look and feel, purist design and vast range of colours make the power outlet strip a superior solution for any interior. Thanks to its exceptionally low mounting depth, a power supply can be integrated nearly everywhere and it coordinates with the colour concept concerned. Colour-matched covers conceal the screws used to attach it. EVOLine offers a wide range of interchangeable options, such as socket or data modules, which can be assembled to suit preferences and quickly and easily replaced at any time. As the versatile power outlet strip is available with international sockets, it can be used anywhere worldwide where a stylish fitted power-supply solution is required.

About Schulte Elektrotechnik

Schulte Elektrotechnik developed EVOLine. In 1964, Siegfried Schulte started an engineering business in Lüdenscheid – and is still working on his vision of making electrical products safer and more intelligent. As a provider of modular system solutions for power and data connections, EVOLine develops products for the entire range of power solutions in office environments or homes. Today,

Schulte Elektrotechnik has more than 30 sales partners worldwide. All EVoline products are manufactured, with a high degree of vertical integration, by around 170 employees at Schulte Elektrotechnik in Lüdenscheid. The high proportion of manual work carried out in the production process guarantees first-class craftsmanship. EVoline has garnered several design accolades, for example, the Red Dot Award, the Iconic Award for Innovative Interiors, the Interzum Award in the High Product Quality category and was a Winner of the German Innovation Award in 2019 alone. Schulte Elektrotechnik has already spent more than five decades producing solutions in Germany in an energy-efficient, green manner.
